[Jump to navigation](#) [Jump to search](#)

Return URL for third-party authentication flows, must be absolute. Either this or *\$1continue* is required.

Upon receiving a REDIRECT response, you will typically open a browser or web view to the specified `redirecttarget` URL for a third-party authentication flow. When that completes, the third party will send the browser or web view to this URL. You should extract any query or POST parameters from the URL and pass them as a *\$1continue* request to this API module.
